

PUBLIC NOTICE

The Baltimore City Department of Public Works and KCI Technologies, Inc. are accepting public review and comments for a request to issue a Stormwater Management Waiver for the Annapolis Road (MD-648) Telecommunications Conduit.

Notice is hereby given that the public is invited to comment on the request by KCI Technologies, Inc. on behalf of FiberLight LLC to waive the requirements of the City Code, in accordance with a conduit project. Comments on the request for SWM Waivers must be received by 5:00 p.m. on **November 1, 2010** to ensure consideration by the Department.

KCI Technologies, Inc. on behalf of FiberLight LLC is proposing to install approximately 4,200 linear feet of 4-4" Duct Bank to be installed using an open trench installation method. The proposed duct bank will include the installation of manholes approximately every 500 feet along the conduit's path. All disturbed areas will be replaced and repaired in kind.

In order to meet the 2010 Baltimore City SWM Ordinance requirements for the proposed improvements, a waiver is required for conduit projects. The project includes removal of existing pervious and impervious areas to install the conduit and then replace those areas in kind in order to return the disturbed areas to preconstruction conditions. The project will not require grading of the disturbed areas. Quantity management is not required since this project will return the area to its original predevelopment flow rates to the stormwater management outfall points.

Report

A copy of the Stormwater Management Report may be obtained by calling and making a request to KCI Technologies, Inc. (Main Number: (410) 316-7800) or by visiting the office during normal business hours. Please ask for Mr. Baseman.
